NOTE: AutoCAD Full Crack 2009 will not support Visual LISP. Visual LISP has been discontinued as of version 2011 While Visual LISP is no longer supported, AutoCAD has a number of Visual LISP partners. Visual LISP is a macro scripting language that provides direct programmatic access to the Autodesk Application Programming Interface (API) for AutoCAD. Visual LISP is provided by Apex Macro Systems, Apex Extensions and VisualLISP Software. There are also a large number of .NET assemblies that are not specific to AutoCAD, but extend or customize its functionality. The second digit represents the minor release number and is incremented for each minor release. The version numbers of subsequent major releases are based on the first two digits of the previous major release.
