which is provided by microsoft. They are currently working on a re-design for this program and it might take some time before it is available again. You could check the website of the program and see if their are any updates available. You can always download the software from the Autodesk website Check out the link Download Autodesk MEP 2016 64-bit Neurosurgical procedures frequently involve the implantation of hardware into a patient, such as a probe and/or a needle. The hardware may be configured to perform a given procedure, such as, for example, the capture of physiological data or drug delivery. When conducting a neurosurgical procedure, an operator usually will first insert the hardware through a patient's skin into the patient's brain tissue. The operator then must make certain that the tip of the hardware is accurately positioned relative to the targeted area of the brain. Accurate positioning is important because if the tip of the hardware is not accurately positioned, then the hardware cannot function as intended
