**What's new:**

Instead of the simple mission-based battle system that focuses on a certain character you are controlling, with "Sword Art Online: Fatal Bullet," the players can freely play the game as if it were a third-person shooter, and rather than characters that have different stages of life, battle with the characters of your own choice. Since the characters of the game are required to roam vast areas in the dreams and nightmares of other people, the battles with the main characters at the start of the game are still critical to the outcome of the story.

The main method of battle in "Sword Art Online: Fatal Bullet" is a battle that can only be won with high-performance weapons. This unique system of equipment allows you to play the game as if it were a third-person shooter, and your fighting style will be customized to your personal preferences. Even for your main character, the weapons that you equip for the battle can be customized on a per-fight basis.

**Exclusive Survival Element** In order to fight an enemy in "Sword Art Online: Fatal Bullet," you can freely change the speed, evasion, magic attack, counterattack, and healing for every one of your weapons. Players who wish to enhance the firepower of their weapons can continue to shoot weapons after defeating enemies and assist in the battle with powerful magic that is dropped from enemies and attack bosses.

While "Sword Art Online: Fatal Bullet" offers large amounts of equipment as standard equipment, the equipment is constantly being updated with different equipment and continuously getting stronger at the same time. Considering that such equipment can fluctuate depending on your level of play, it is possible to realize the effects of equipment at higher levels than ever before.

**Each Character Has His Own Fantasy Adventure** As the skills of the characters are various, combined with the fact that the action can be accessed directly from the dreams of others, the game is deeply connected to the hearts of players. Additionally, as with the concept of single player game at the beginning of the game, even when it comes to the online mode, it is the goal of the players to complete the story mode as the main character, not to defeat the enemy.
